

NEW RELEASE- For Immediate Distribution

LEHMAN TRIKES, INC.

TSXV -- LHT

November 13, 2007

BAKER REVERSE DRIVES LEHMAN AHEAD

Lehman is extremely pleased to announce an agreement has been signed with BAKER Drivetrain™. BAKER is internationally known for its premium drivetrain innovations for American-made motorcycles. The much awaited BAKER F6R reverse modifies the original Harley-Davidson® six-speed transmission which has been jointly tested by Lehman and BAKER and is exclusive to the two companies. Lehman trikes powered by Harley-Davidson's® 2006-2008 Dyna and 2007-2008 FL and Softail are the only trikes which will be available with Baker reverse at this time. The reverse gear will be available for shipment to dealers and factory conversions during the first week of December 2007.

BAKER Drivetrain™ designed and created the BAKER OD6 (6-Speed Overdrive) transmission for the American V-Twin industry which revolutionized the drivetrain industry. BAKER strives to retain the integrity of their design technologies, methods and products. They believe that their innovative products continue to make significant contributions to the development of the American motorcycle industry.

Lehman and BAKER state that the new reverse complements the Harley-Davidson® factory 6-speed like a true Original Equipment option. The BAKER reverse is selected with the foot shift lever and a safety switch. Dealer installation of the reverse is relatively straightforward for those familiar with the Harley-Davidson® six-speed transmission. Dealers who prefer factory conversions can depend on quality installations by BAKER trained technicians at the Lehman assembly plant. Additionally, BAKER Drivetrain™ directly supports a limited three (3) year/unlimited mileage warranty.

Dan Patterson, President of Lehman stated, "The agreement between BAKER and Lehman has been in the works for sometime. The agreement has come to fruition and we could not be more delighted. For months, BAKER and Lehman have diligently worked on the reverse gear, including extensive testing by both companies. BAKER is an outstanding company, possessing both integrity and first-rate individuals in their ranks. We feel that the addition of BAKER Drivetrain™ to our growing list of strategic partners is good for both companies, as well as the industry. Once again, as 'the trike company' and 'Leader of the Three World,' we have added yet another 'first' to our ever-expanding list of cutting edge innovations, products and programs."
